Budget Proposal for "Bill Management System for Restaurant"

Introduction:

This Bill Management System for Restaurant, Talking about the features of this system, it contains only the admin section. The admin manages all the orders management, payments, and report. Here, GUI is created using Python Tkinter. Here, the user can enter customer details and select items from the menu. The software displays the menu items as category wise. Users can generate bills after selecting at least 1 item. The system displays a bill inside the 'Bill Area' section.

Also, the design of this system is pretty simple so that the user won't get any difficulties while working on it.

Scope of work

The system will avail the owner of the restaurant in preparing the bill of each customer after providing the valuable accommodations by enhancing their experience for getting victuals from the restaurant. It will withal magnetize the customers because they will get supplemental benefits along with the accommodation provided by the restaurant.
