Narapally, 500088

Ref: Sponsorship for Project Dated: 23/11/2021

Subject: Acceptance of Financial aid for the project “ENVIRONMENTAL PARAMETERS  
MONITORING AND CONTROLLING BY USING PC”

Dear Sir,

Best wishes from R TECHNO SOLUTIONS, Hyderabad.

Our staff and officials have undergone the scope of work for the proposed project. We extend our full support to carry out this research work. In this regard, we are glad to sponsor your project “ENVIRONMENTAL PARAMETERS MONITORING AND CONTROLLING BY USING PC” with INR. 2, 40,000 (Two lakhs forty Thousand rupees only)

**Subject:** Release of Work order for the project "ENVIRONMENTAL PARAMETERS MONITORING AND CONTROLLING BY USING PC".

Dear Sir,

We have undergone the proposed project with our senior professionals. We extend our full support to carry out this research work. In this regard, we are glad to release the work order for the project "ENVIRONMENTAL PARAMETERS MONITORING AND CONTROLLING BY USING PC" from today onwards. The following terms of payment will follow as per the budget proposal to complete the project.

S. No.	Mode of payment	Amount (INR)
1.	Term-1 (Work order & Analysis)	50,000
2.	Term-2 (Modeling and Design)	90,000
3.	Term-3 (Fabrication, Machining and Testing and Delivery)	1,00,000
	Total	2,40,000

Best wishes from R TECHNO SOLUTIONS, Hyderabad

Subject: Sponsorship for funded project – Regarding.

Dear Sir,

Best wishes from Princeton Institute of Engineering & Technology for Women.

Princeton Institute of Engineering & Technology was established in the year 2009. PETW is approved by AICTE New Delhi, affiliated to JNTU, Hyderabad. PETW is an ISO 9001:2015 certified institution and TASK. The faculties of various departments are actively pursuing research in their respective technical departments under R&D wing of PETW. Dr. RAJEEV SHRIVASTAVA, Professor, Department of ECE, is the principal investigator for this proposed work.

We request your kind cooperation and financial aid of INR. 2, 40,000 (Two lakhs Forty Thousand rupees only) in the “ENVIRONMENTAL PARAMETERS MONITORING AND CONTROLLING BY USING PC” Herewith we have enclosed the budget proposal for the project. Our faculty will contact you in person along with this letter.

Princeton Institute of Engineering & Technology for Women is expecting positive response from you.

### Budget Proposal for "ENVIRONMENTAL PARAMETERS MONITORING AND CONTROLLING BY USING PC"

#### Introduction:

This **ENVIRONMENTAL PARAMETERS MONITORING AND CONTROLLING BY USING PC**. Environmental pollution is an international serious, acute, health and social problem that humans are responsible for. Rapid technology evolution could provide us solutions to predict and monitor environmental parameters and thus minimize or even eliminate environmental pollution. Using a wireless sensor network (WSN) and an Internet of Things (IoT) implementation, we can create an eco-friendly and controlled environment. This paper presents an embedded and standalone system that can monitor, store and analyse environmental data as well as calculate energy consumption in specific settings. Information is available via a web application with central management abilities. Our appliance can work standalone as well as part of a smart ICT grid of appliances. The system aims to determine and designate environmental spaces, in which human activities could be harmful. More specific, it can be used at world cultural heritage and archaeological places, building, constructions where allowance of human intervention is prohibited or very limited. Collecting and analyzing data can help us estimate the environmental consequences of human actions.

#### Scope of work

**A complete environmental monitoring system allows you to keep tabs on the following factors:**

- 1.0 Temperature. Temperature is a critical factor to monitor in a data center. ...
- 2.0 Humidity. ...
- 3.0 Airflow. ...
- 4.0 Power. ...
- 5.0 Smoke. ...
- 6.0 Increased Reliability. ...
- 7.0 Streamlined Workflow. ...
- 8.0 Reduced IT Costs.

## Budget Proposal for "Bill Management System for Restaurant"

### Introduction:

This **AUTHENTICATION OF PRODUCT AND COUNTERFEITS ELIMINATION USING BLOCKCHAIN**. A blockchain is a digital ever-growing list of data records. Such a list is comprised of many blocks of data, which are organized in chronological order and are linked and secured by cryptographic proofs. Blockchain transactions occur within a peer-to-peer network of globally distributed computers (nodes). Each node maintains a copy of the blockchain and contributes to the functioning and security of the network.

### Scope of work

Blockchain technologies have gained interest over the last years. While the most explored use case is financial transactions, it has the capability to agitate other markets. Blockchain remove the need for trusted intermediaries, can facilitate faster transactions and add more transparency. This paper explores the possibility to deflate counterfeit using blockchain technology. This paper provides an overview of different solutions in the anti-counterfeit area, different blockchain technologies and what characteristics make blockchain especially interesting for the use case. We have developed three different concepts and the expansion of an existing system concept, is pursued further. It is shown, that reducing counterfeits cannot be achieved by using technological means only. Increasing awareness, fighting counterfeiters on a legal level, a good alert system, and having tamper-proof packaging are all important aspects. These factors combined with blockchain technology can lead to an efficient and comprehensive approach to reduce counterfeiting  
Keywords – Authentication, Blockchain, Encryption.
