Description	<p>The speaker guest lecture has been warm welcomed to the session on behalf of Princeton Institute Of Engineering And Technology For Women. The Coordinator has given a speaker achievements and experience and Principal Madam too welcomed him for the session on behalf of the college.</p> <p>The speaker took over the session and delivered a lecture on Identifying Funding agencies for projects. Totally 47 members participated in this seminar. The main theme of this seminar is to promote excellence in research in higher education by supporting research programmes of University and College teachers in various disciplines. Traditionally, universities have been the centers of research. Although, the Government has a network of science and technology laboratories for research and development, the major base of researchers in science and technology remains with the universities. Therefore, university and college teachers need to be supported to meet this requirement.</p>

Description	<p>The speaker has been welcomed by the workshop coordinator to the session on behalf of Princeton Institute Of Engineering And Technology For Women and gave an introduction about the speaker.</p> <p>The coordinator has handed over the session to the speaker and he delivered his lecture on the given topic - Research Problem and Literature Review. A research problem identification helps any researcher to formulate that sequence of research work. Research problem also helps you avoid unnecessary steps during the research. A research problem is the preliminary step in conducting a research study. The research problem should have great clarity since the research process in itself generates more questions. Importance of literature review in research includes - Provides information for relevancy and coherency to check the research. Apart from elucidating the continuance of knowledge, it also points out areas that require further investigation and thus aid as a starting point of any future research.</p> <p>He also explained about the importance of Literature Review: A literature review is a comprehensive summary of previous research on a topic. The literature review surveys scholarly articles, books, and other sources relevant to a particular area of</p>

research. The review should enumerate, describe, summarize, objectively evaluate and clarify this previous research. Finally he focused on the four major goals of a literature review: To determine what exists in the scholarly literature. To identify possible gap(s) in the scholarly literature for further research. To inform the research topic, theory (if applicable), and associated methodology. To compare/contrast against findings resulting from the current Study.
